FORTBRAND SERVICES, INC., AND HAGIE MANUFACTURING COMPANY ANNOUNCE DELIVERY OF HAGIE GST 20 TO DETROIT METROPOLITAN WAYNE COUNTY AIRPORT

Plainview, New York, November 1, 2007

Fortbrand Services, Inc., the exclusive North American distributor for the Hagie GST 20, a multi-functional, multi-seasonal airfield maintenance unit, announces that Detroit Metropolitan Wayne County Airport has taken delivery of the sixth combination Hagie GST 20 airport sprayer/Vammas PS4200 Edge Light Plow in North America.

This unique multi-functional, multi-seasonal unit was developed for airport use in cooperation with the staff of Minneapolis/St. Paul International Airport. Currently the equipment is in use at JFK, BOS, MSP, RNO and YYC. The unit can be used as (i) a high-speed, precision runway deicer and pesticide/herbicide applicator, saving both time and money in spraying applications, and (ii) as a runway/taxiway light plow and sign cleaner, saving airport operators hundreds of thousands of dollars in performing these tasks, as compared with traditional labor intensive methods and (iii) a flail mower, making the Hagie GST 20 the only piece of airfield maintenance equipment that can be used everyday of the year.

Fortbrand Services is a niche business specializing in the sale, lease and renting of aircraft ground support equipment throughout the aviation industry. The Company also engages in related activities and acts as manufacturer's representative for the sale and lease of unique aviation equipment, including the high-speed Vammas PSB5500, PSB4500 and Fresia F2000.
