FORTBRAND SERVICES, INC., BEAM A/S AND MANCHESTER-BOSTON REGIONAL AIRPORT ANNOUNCE THE INTRODUCTION OF NEW MULTI-TASK AIRFIELD MAINTENANCE EQUIPMENT

Plainview, New York, December 18, 2007

Fortbrand Services, Inc., the exclusive North American distributor for Beam A/S, a Danish manufacturer of specialized, high performance airport sweepers, announces the sale of a new model VX800 Multi-Task Airport Service Vehicle to Manchester-Boston Regional Airport (MHT).

The VX800 is a self-contained, one operator vehicle capable of performing a number of tasks typically required for the proper maintenance of airfield facilities. The working components are mounted on a U.S. manufactured chassis and are comprised of a heavy duty stainless steel hopper and water and detergent tanks. Primarily designed for runway rubber removal, the VX800 Multi-Task Airport Service Vehicle is also capable of performing apron sweeping and scrubbing, runway sweeping, street sweeping and various liquid or debris pick-up through its full width suction nozzles and wander hose.

When required, the VX800 has a hot water system capable of delivering high pressure hot water through its spray bars or a hand wand.

Fortbrand Services is a niche business specializing in the sale, lease and renting of aircraft ground support equipment throughout the aviation industry. The Company also acts as a distributor of unique aviation and airfield maintenance equipment, including high-speed Vammas snow removal vehicles and the multi-function Hagie GST20, as well as the Beam VX800.
