FORTBRAND SERVICES, INC., AND HAGIE MANUFACTURING COMPANY ANNOUNCE DELIVERY OF HAGIE GST 20 TO JOHN F. KENNEDY INTERNATIONAL AIRPORT

Plainview, New York, October 1, 2008

Fortbrand Services, Inc., the exclusive North American distributor for the Hagie GST 20, multi-function, multi-season airfield maintenance unit, announces that the Port Authority of New York and New Jersey has taken delivery of a Hagie GST 20 airport sprayer, equipped with a Vammas PS4200 Edge Light Plow and Tiger 24' flail mower for use at John F. Kennedy International Airport.

This unique multi-function, multi-season unit was developed for airport use in cooperation with the staff of Minneapolis/St. Paul International Airport. Currently the equipment is in use at JFK, BOS, MSP, RNO, DTW and YYC. The unit can be used as (i) a high-speed, precision runway deicer and pesticide/herbicide applicator, saving both time and money in spraying applications; (ii) as a runway/taxiway light plow and sign cleaner, saving airport operators hundreds of thousands of dollars in performing these tasks, as compared with traditional labor intensive methods and (iii) a flail mower, making the Hagie GST 20 the only piece of airfield maintenance equipment that can be used everyday of the year.

Fortbrand Services is a niche business specializing in the sale, lease and rental of aircraft ground support equipment throughout the aviation industry. The Company also is a distributor for unique airfield maintenance equipment, including the Hagie/Vammas PSB 5500, Hagie GST 20 Sprayer, Fresia F2000 Compact Sweeper and Beam VX 800 Multi-Task Airport Service Vehicle.
