FORTBRAND SERVICES, INC., AND HAGIE MANUFACTURING COMPANY ANNOUNCE PURCHASE ORDER FOR ONE HAGIE GST 20 BY QUAD CITY INTERNATIONAL AIRPORT (MLI)

Plainview, New York, October 22, 2010

Fortbrand Services, Inc., the exclusive North American distributor for the Hagie GST 20, a multi-functional, multi-seasonal airfield maintenance unit, announces that Quad City International Airport (MLI), located in Moline, IL, has issued a purchase order for one combination Hagie GST 20 airport sprayer/Vammas PS4200 Edge Light Plow.

This unique multi-function, multi-seasonal unit was developed for airport use in cooperation with the staff of Minneapolis/St. Paul International Airport. Currently the equipment is in use at BOS, DTW, JFK, MKE, MSP, RME, RNO and YYC. The unit can be used as (i) a high-speed, precision runway deicer and pesticide/herbicide applicator, saving both time and money in spraying applications; (ii) as a runway/taxiway light plow and sign cleaner, saving airport operators hundreds of thousands of dollars in performing these tasks, as compared with traditional labor intensive methods and (iii) a flail mower, making the Hagie GST 20 the only piece of airfield maintenance equipment that can be used everyday of the year.

Fortbrand Services is a niche business specializing in the sale, lease and rental of aircraft ground support equipment throughout the aviation industry. The Company also is a distributor for unique airfield maintenance equipment, including high-speed Vammas snow removal vehicles, the multi-function Hagie GST 20 Sprayer and the Beam VX 800 Multi-Task Airport Service Vehicle.
